

METHODS AND APPARATUSES FOR SELLING, DISTRIBUTING AND DISPENSING FABRIC CARE PRODUCTS

ABSTRACT OF THE DISCLOSURE

A method for recommending fabric care products, by the steps of: under control of a first client system; collecting personalized data pertaining to a consumer's fabric care needs and habits; and sending the data to a server system. Then, under control of the server system: receiving the data from the first client system, and based on the consumer's personalized data determining a recommendation for one or more fabric care products. The recommendation is then sent to the first client system, a second client system or both. The recommendation can assist the consumer in their fabric care usage and purchase decisions, and automated purchasing can also be accomplished. Apparatuses for carrying out these methods are also disclosed.
